

## Water Safety Tips

### Home – Key Safety Tips

- Supervision by an adult at all times when in and around water (pools, spas, baths, buckets, dams, water tanks, troughs and irrigation channels).
- Pools must be fenced with a self-latching gate.
- Remove toys from swimming pools and baths after use because young children are attracted by them.
- Keep fish ponds and water features covered.
- A rigid cover should be installed over spas.
- Empty paddling pools immediately after use.
- Keep liquid-filled buckets out of reach of children.
- Never leave children alone in the bath.
- Keep the bath plug out of reach of small children.
- Keep top-loading washing machines closed.
